	Easy	1759			
	Full	1759			
Weight (kg)	First	400			
	Easy	400			
	Full	410			

## CHARACTERISTICS

Using a divider rounder allows dividing the dough in equal dough pieces and rounding them for making buns.

These are equipped with wheels for easy mobility and that retract during the use of the machine. Maintenance is simple through easy access to components. Moreover, the separation disc can be easily tilted forward.

The Teflon coating on that same disc allows quick and easy cleaning.

## CONSTRUCTION

Structure made of epoxy painted steel, on casters.

- Controls are brought together for easier use.
- Easily interchangeable dividing head.
- On the *First* models, the putting under pressure and cutting are made by upper lever and the rounding by lateral lever.
- On the *Easy* models, the putting under pressure and cutting are automatic and the rounding is done using a front lever.
- On the *Full* models, the putting under pressure and cutting are programmed.
- Each machine is delivered with 3 rounding plates with tracks corresponding to the number of divisions of the machine.
- Engine protected by a thermal-magnetic circuit breaker.
