

STRATUS sheeters

**Please find hereafter the STRATUS sheeter range
description**

- **STRATUS**

- **The range**

This range of sheeters STRATUS is dedicated to artisanal bakers who want to promote homemade pastries with good taste by using a practical, strong and reliable equipment.

The Range is composed by the JUNIOR model to be placed on a table, and the SENIOR and SENIOR XL models standing on their own frame.

JUNIOR

SENIOR

SENIOR XL

The SENIOR XL includes a PLATINUM version which contains the following options :

- Digital display
- Pedal
- Double speed selector
- Reinforced table
- Cutting tooling
- Cutting support

- **Arguments**

The STRATUS sheeters show their strength at first glance with their metallic cover, their aluminium graduation, metallic joystick and their woven plastic bands. There is no doubt about their longevity.

Concerning the maintenance, their well-thought removing system enables the two bands to be replaced in less than one hour !

A reinforced conception and a selection of even more sturdy materials for a polyvalent and intensive use.

More technical options for an even more precise and unequalled result in the bakehouse.

- **Price**

Sheeter
