TORNADO

PLANETARY MIXER

Tornado
40

Designed specifically for bakeries and pastry shops, the Tornado 40 planetary mixer is equipped with a stainless steel bowl with a capacity of 10.5 gallons.

Delivered with 3 interchangeable tools, it allows the preparation of all types of mixes such as pastry preparations (cream, sponge cake, meringue, etc.) and a wide variety of doughs (cookies, brioche, special breads, viennese pastries, etc.).

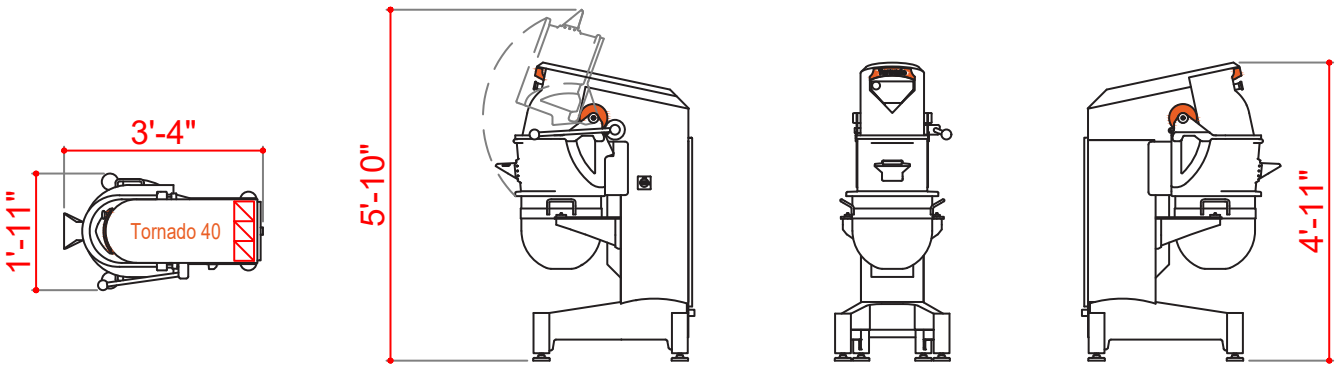
Advantages

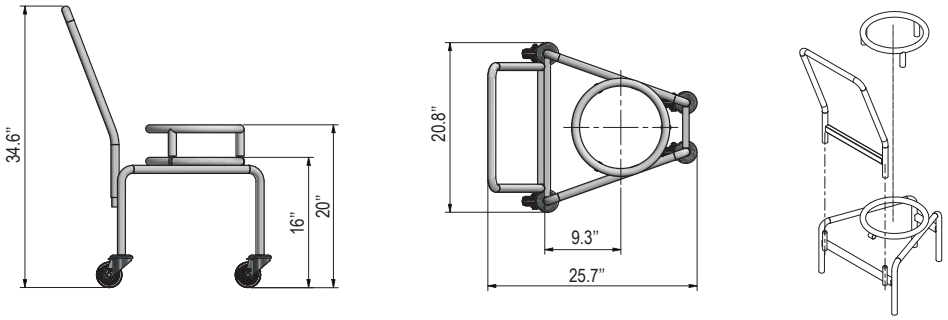
- Frame and cover in white painted steel.
- The frame rests on 4 anti-vibration feet for a perfect stability of the machine.
- Robust, precise and silent mechanical parts thanks to the adoption of a mixed transmission system with belts and gears in treated steel with sealed lubrication.
- This reinforced mechanism, placed in a cast iron head, generates the planetary movement of the tool.
- The motor is protected by a thermal relay.
- The stainless steel tank is monobloc and has two handles.
- An indexing device positions the tank on its support. The lifting of the tank is controlled by an ergonomic lever.
- A transparent anti-flour spattering cover ensures a safe operation for the user.
- The lifting cover, not completely jointed with the structure, allows an ideal ventilation of the dough inside the tank.
- Opening the cover stops the mixer.
- Trapdoor for the insertion of the ingredients.
- A light illuminates the inside of the bowl.
- Stainless steel foot option adapted to aggressive cleaning products.

IMPLEMENTATION

DIMENSIONS AND CONNECTIONS



Tornado 40



10.5 gal tank support cart (option)

Pavailler Solution:
Triphase electrical cable,
male plug provided.

At customer's charge:
PLUG connection female ht 4'.
